FOS CERAMICHE

ANEMOS

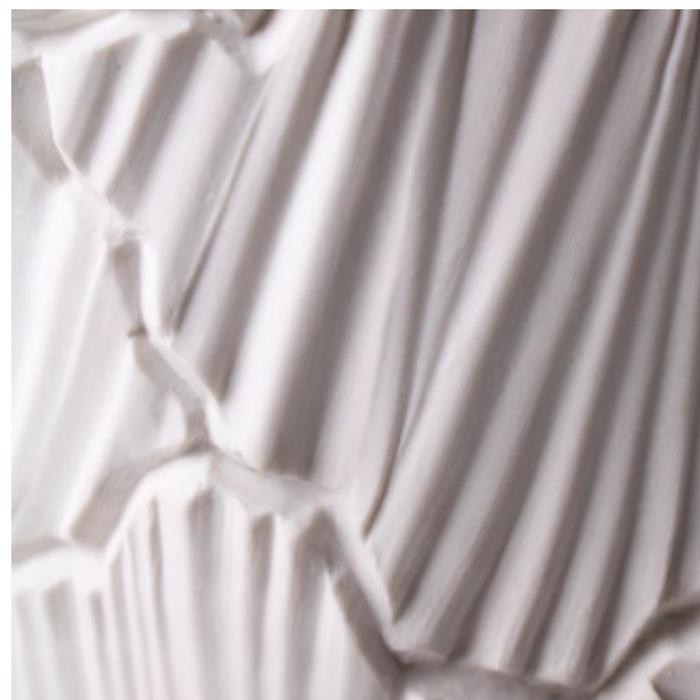

*Wind, rain and time,
the greatest sculptors,
the best teachers*

The soft curves of canals shaped by wind create a unique rhythm on the surface, interrupted by deep cracks, like a dry land which discloses a precious secret. ANEMOS collection is the result of an accurate research on texture and shapes, developed by Piero Mazzotti thanks to the experience obtained in over thirty years in the field of ceramic production. The pure white of porcelain is emphasized by the alternation of lights and shadows, the signature style of FOS Ceramiche. Rocks dug by the weather, sometimes crossed by gold and platinum venations, creating a sort of mineral kintsugi.

FOS CERAMICHE

ANEMOS WHITE

Vases are presented in the pure white of biscuit porcelain, which emphasizes the volumes giving a more sculptural look to the objects.

ANEMOS GOLD

Vases are decorated by hand with a precious metal, gold, and fixed through an additional meticulous firing process.

ANEMOS PLATINUM

Vases are decorated by hand with a precious metal, platinum, and fixed through an additional meticulous firing process.

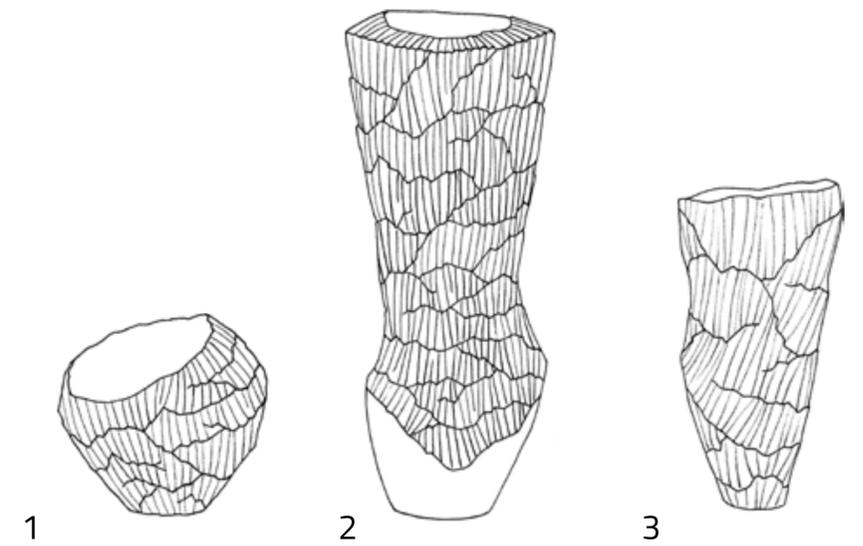

ANEMOS ROCK

Vases are entirely decorated with metal oxides, creating unique chromatic effects recalling the volcanic rocks.
