

INNER BEAUTY

the hole as a glimpse of the inner reality, playfully reveals universal messages

Designed by Enea Mazzotti as reinterpretation of ELLIPSIS objects, these porcelain vases have then become a new collection, with its own soul and and personality. The holes, typical of ELLIPSIS, are filled with meanings: roses, butterflies, moss, a luxuriant and rebellious nature that breaks the minimal look of these sculptures and create a dialogue between the inside and the outside. FALLING IN LOVE vases are an ironical representation of love and its most known symptom, the "butterflies in the stomach". FULL BLOOM tells the importance of looking beyond appearence, to the hidden beauty inside of us. INSIDE-OUT seeks a lost balance between human and natural world, a future of paceful coexistence and contamination. INNER BEAUTY is a collection of unique pieces: each butterfly, rose and tuft of moss is complety handmade and different from the others.
