

# PORIFERA FOS CERAMICHE

PORIFERA Collection celebrates the beauty of the Ocean, with a myriad of tiny holes to touch and explore.

The textures and shapes recall corals and anemones, exotic creatures that create evocative and unique atmospheres.

Vases, bowls and wall plates are made of porcelain and most of them are decorated with metal oxides, that produce a multitude of colors that are always different and unique. The green, blue, purple and pink shades prevail, streaked with crystallizations that light up the tones and alternate matt and glossy surfaces.

The decorative plates have various diameters and heights, to create overlapping patterns and natural geometries suitable for all spaces.

Every object is 100% handmade in Italy, the result of a constant balance between art, craft and design.
